Annual Report 2001

Mulvihill Premium Global Telecom Fund Global Telecom Split Share Corp. Message to Shareholders → In its third year of operation, the Corporation once again exceeded its target levels for distributions to shareholders. During the fiscal year ended June 29, 2001, the Corporation paid a total of \$1.60 per unit to Class A shareholders, consisting of regular dividends of \$1.20 per unit, plus special dividends of \$0.40 per unit.

Preferred shareholders received \$0.88 per unit. This amount represents a gross-up to compensate for the proportion of distributions received as capital gains versus dividend income. The adjustment results in more favorable tax treatment of these distributions under recently changed federal tax policy.

The Corporation's dividend policy calls for minimum distributions to Class A shareholders of \$0.30 per quarter, or \$1.20 per annum, which is equivalent to a yield of 8% on the original issue price. For preferred shareholders, the target is \$0.83 per annum, equivalent to a yield of 5.5% on the original issue price.

Favorable distributions for fiscal 2001 were achieved despite a year of weakening stock values in the telecommunications sector and a decline in the net asset value per Class A share from \$15.46 on June 29, 2000 to \$5.34 at year end. A summary of the Corporation's investments is included with the financial statements in this annual report. We would like to take this opportunity to thank our shareholders for their continued support.

**Investment Highlights** 

#### **Investment Objectives**

The Corporation has two main investment objectives. The first is to provide Preferred shareholders with quarterly cash dividends to yield 5.50% per annum based on the preferred share's par value (\$15.00) and, the second objective is to provide Class A shareholders with all excess realized income of the Corporation at each fiscal year end. The Corporation has set an initial dividend policy on the Class A shares of \$0.30 per quarter or 8% per annum based on the shares' issue price of \$15.00.

#### Investment Strategy

The Corporation intends to achieve its investment objectives by investing its net assets in a diversified portfolio consisting principally of common shares issued by companies within the Corporation's Global Telecom Universe. To generate additional returns above the dividend income earned on the portfolio, the Corporation will from time to time, write covered call options in respect of all or part of the common shares in the Portfolio. From time to time, the Corporation may hold a portion of its assets in cash equivalents, which may be utilized to provide cover in respect of the writing of cash covered put positions.

# Commentary

The past year was marked by a sharp decline in the pace of global economic growth. This pushed the telecommunications sector into recession at a time when most major companies had invested heavily in expanding their facilities. Slumping demand has seriously strained balance sheets, leading to massive layoffs and in some cases, bankruptcies. Stock values have plunged, and will remain depressed until signs of renewed demand appear.

While the near-term outlook is not bright, we remain confident the telecommunications sector will return as a key driving force in the next expansion cycle. A number of companies are now taking steps to improve their competitive positions by selling some assets, rationalizing product lines and focusing on key geographic regions. As these companies get their balance sheets in order, they will be well positioned to return to profitability when global growth resumes.

The Corporation is maintaining a conservative portfolio of the highest-quality stocks, as well as substantial cash reserves (approximately 36% of Total Assets) to take advantage of opportunities as they arise. We believe the telecommunications sector will begin to experience improved conditions during the next fiscal year.
